SUMMARY

Flutter Developer with **2+ years of experience** building and shipping production mobile applications across **EV, healthcare, e-commerce, and ride-booking** domains. Experienced in designing scalable Flutter applications using **Clean Architecture**, integrating **REST APIs and real-time systems**, payments, maps, push notifications, and delivering applications across **Android and iOS**.

TECHNICAL SKILLS

Flutter: Dart, Flutter, Provider, BLoC/Cubit, GetX, go_router

Architecture: Clean Architecture, MVVM, Repository Pattern

Networking & Real-Time: REST APIs, Dio, Socket.IO, Firebase Cloud Messaging (FCM)

Integrations & Storage: Google Maps SDK, Geolocation, Razorpay, Cashfree, Firebase, Hive, SharedPreferences

Testing & Tools: Unit Testing, Widget Testing, Integration Testing, Git, CI/CD

EXPERIENCE

Flutter Developer

Dec 2025 – Present

RCV Technologies

Full Time · On-site

- Developed production-grade Flutter applications across **medical transportation, catering, and EV charging** domains, supporting Android and iOS releases through internal testing and **TestFlight**.
- Building a production-grade **EV charging platform** integrating OCPP-backed REST APIs for remote charger operations, **Socket.IO** for real-time charging updates, and **Razorpay** payment workflows.
- Implemented **Socket.IO**-based real-time data streaming and live chat, along with **Firebase Cloud Messaging (FCM)** for push notifications across Android and iOS.
- Applied **Clean Architecture, Provider, and Repository Pattern** to separate presentation, business logic, and data-access layers while contributing to CI/CD and mobile release workflows.

Flutter Developer

Dec 2023 – Nov 2025

Skillancer Private Limited

Full Time · Remote

- Developed and maintained client-facing Flutter applications across **grocery, ride-booking, and event-booking** domains, including production releases to the **Google Play Store**.
- Applied **Clean Architecture, MVVM, Repository Pattern, Provider, and GetX** to build maintainable and scalable application features across multiple projects.
- Built REST API integrations using **Dio**, implementing interceptors, authentication handling, centralized error handling, retry strategies, and response processing.
- Implemented production features including **real-time tracking, payments, maps, authentication, and push notifications**, while managing debugging, releases, and post-release maintenance.

PROJECTS

Cpolix — Smart EV Charging Platform

May 2025 – Present

- Structured the application using **Clean Architecture and Provider**, separating presentation, business logic, and data layers across charging, payment, maps, history, and support modules.
- Integrated **Socket.IO** for real-time charging-session updates, including charger status, energy consumption (kWh), charging percentage, and session duration.
- Integrated OCPP-backed REST APIs for remote charger **Start/Stop operations**, coordinating API responses with real-time charging events.
- Implemented station discovery and navigation using **Google Maps SDK and geolocation**, along with **Razorpay payments**, transaction history, ticket support, and Socket.IO-powered live chat.

Rush Baskets — Grocery Delivery Platform

Dec 2024 – Mar 2025

- Developed dual Flutter apps (**Customer + Delivery Agent**) for ordering, delivery management, real-time tracking, and **Socket.IO**-powered communication.
- Integrated **Cashfree Payment Gateway** with end-to-end payment flows and multiple payment methods for customer orders.
- Tech Stack:** Flutter, Dart, GetX, REST APIs, Socket.IO, Cashfree | [Play Store \(Customer\)](#) · [Delivery](#) · [App Store](#)

SureRide — Medical Transportation Platform

Dec 2025 – Feb 2026

- Built medical transportation workflows for ambulance, wheelchair-accessible vehicle, and stretcher services with **live driver tracking and dynamic ETA** using Google Maps SDK.
- Implemented a real-time ride lifecycle (**Requested → Accepted → En Route → Arrived → Completed**) using **Socket.IO and FCM** for synchronized ride-status updates.

EDUCATION

Government Engineering College, Azamgarh

2020 – 2024

B.Tech. in Information Technology
